

MANISH

Data Analyst

+91-8139817262 | manishmaniyadhav@gmail.com | [linkedin.com/in/manish050](https://www.linkedin.com/in/manish050) | github.com/manishzzz | Kasaragod, India

TECHNICAL SKILLS

Languages & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Window Functions, CTEs, Subqueries, Joins, Query Optimization — PostgreSQL, MySQL)

Analytics & Reporting: Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing, KPI Reporting, Business Insights, GA4, Statistical Analysis

Visualization & BI: Power BI (DAX, Star Schema), Matplotlib, Seaborn, Jupyter Notebook

Tools: Streamlit, n8n, Zapier, Notion, Excel, Git

EXPERIENCE

AI Research Intern | Laneway

Nov 2025 – Feb 2026

- Automated document-heavy workflows using n8n and Zapier, reducing manual processing time by ~40% across internal operations
- Evaluated and benchmarked 15+ AI tools; produced structured comparative analysis reports that directly informed technology adoption decisions
- Coordinated research deliverables across a 10-member cross-functional team, consistently meeting milestones during a high-velocity implementation phase

Research & Development Intern | CoCreate Ventures

Oct 2024 – Mar 2025

- Conducted structured competitive research across 5+ startup domains; synthesized findings into market analysis reports that shaped go-to-market positioning
- Achieved Finalist standing in Samsung Innovation Challenge 2024 (top teams out of 500+ nationwide entries) for an AI-driven product concept backed by data analysis

PROJECTS

Amazon Sales Analytics — Optimization & Forecasting | Python, SQL, Power BI, DAX, Excel

- Built a multi-sprint end-to-end analytics system covering sales performance, PPC optimization, funnel analysis, and demand forecasting across an Amazon e-commerce dataset
- Designed a Star Schema data model and implemented DAX measures for KPIs including ROAS, ACOS, and conversion rate; integrated forecasting for reorder point and safety stock planning
- Delivered a multi-page interactive Power BI dashboard enabling data-driven decisions on ad spend, inventory, and pricing strategy

Quick Commerce End-to-End Data Analysis | Python, Pandas, Matplotlib, Seaborn, Jupyter Notebook

- Ingested and cleaned a real-world e-commerce dataset (10,000+ records) using Pandas; resolved inconsistencies to produce an analysis-ready structured dataset
- Identified top-performing categories, seasonal trends, and customer behavior patterns; surfaced 5+ actionable business insights presented via Matplotlib/Seaborn dashboards for non-technical stakeholders

Reusable Data Cleaning & Preprocessing Pipeline | Python, Pandas, NumPy, Matplotlib

- Engineered a modular data cleaning framework handling missing values, duplicates, type normalization, and outlier treatment (IQR method), producing ML-ready datasets with validated structure

EDUCATION

Bachelor of Engineering — Computer Science

Dec 2021 – Aug 2025

Vivekananda College of Engineering and Technology, Puttur, Karnataka

CERTIFICATIONS & ACHIEVEMENTS

Certifications:

- SQL for Data Analysis — Window Functions, Joins, CTEs, Subqueries (PostgreSQL, MySQL) | Udemy, 2025
- Data Analysis with Python — NumPy, Pandas, Data Cleaning, Advanced Visualization | Udemy, 2025
- Generative AI for Digital Marketing — Prompt Engineering, AI Content Strategy | Udemy, 2025

Achievements:

- Finalist — Samsung Innovation Challenge 2024 (500+ nationwide entries) | Finalist — HackArCode National Hackathon 2024
- Delivered 5+ technical workshops on AI tools and data automation to 20+ students
